JADAI STUDIOS · NIGERIAN EXAM PREPARATION, POWERED BY AI

1. Why this matters now

Nigerian students are sitting the same high-stakes exams with the same overcrowded classrooms, the same thin materials, and the same one-tutor-to-hundreds ratio. In the 2025 UTME, about 75% of candidates scored below 200 out of 400. The pattern is not a surprise to any principal who has watched a strong student freeze in a CBT hall. What has changed is that the exam itself is going digital: WAEC and NECO have directed full CBT, and JAMB has floated a personal-computer option from 2027. A school that prepares students for the paper era is preparing them for an exam that no longer exists.

Preparation is the part that can still be fixed in one term, and that is the part we are offering to carry with you.

2. Our proposal

ExamPadi AI partners with your school to put the platform in front of every student. The school pays nothing to begin, earns a share of every subscription that comes through its own code, and gets a dedicated technical partner for the whole session.

3. What ExamPadi AI delivers

Pattern-based question bank

Past questions across JAMB, WAEC, NECO, NABTEB, and POST-UTME, arranged by topic and exam style so students drill the pattern that actually repeats.

CBT simulator that feels real

Timed, scored, and laid out like the hall. Students learn the interface, the clock, and the nerve before the day itself.

Built for limited data

Light pages, offline practice, and a build that holds up on a shared phone and a weak signal. No school needs to fund a lab to start.

24/7 AI tutor

Students photograph any question or upload a document; the tutor walks them through it step by step, in plain language, at their level.

Teacher dashboard

Class performance, weak-topic heatmaps, assignments, and announcements in one place, so support is aimed where it is needed.

Your material, your control

Teachers can set and share their own material. Nothing leaves the school's control, and nothing is used to train anyone else's model.

4. What the school gains

Stronger results

Consistent daily practice, instant feedback, and early flags on weak topics raise mock scores and, more importantly, confidence in the CBT hall.

A visible edge

A school that prepares students for the digital exam is easy for parents to see and hard for a competitor to match on a brochure.

Revenue & support

On the Partner Plan the school earns on every subscription and pays nothing to start, with a named technical contact for the full session.

> **Why this school.** This proposal is for a school whose standard is already visible in how it runs its sciences and its discipline, and whose leavers have gone on to competitive courses. ExamPadi was built for schools with this standard — where a student is expected to go somewhere in life, and the exam must not stand in the way.

₦0	2 weeks	24 hours
cost to the school to begin (Partner Plan)	pilot with one class before any wider rollout	to have teacher accounts live

5. Partnership options

OPTION	WHAT THE SCHOOL PAYS	WHAT THE SCHOOL GETS
A — Partner Plan Recommended	Nothing. Students or parents pay ₦3,500/month or ₦28,000/year (under ₦80 a day).	School earns 20%, rising to 25% at 100+ active paid students. Full teacher dashboard included.
B — Classroom Plan	₦2,800 per student/month (10% off at 10+ students) or ₦22,000 per student/year (~21% off at 15+).	Full Pro access, teacher dashboard, assignments. Volume discount locked in at the threshold.
C — School-Wide	Custom bulk pricing for 50+ students.	On-site training, dedicated support, priority feature requests.

Every student can start on the free plan — 15 questions and 3 AI messages a day, two subjects — with no commitment. Pro plans give 150–250 AI messages per month, unlimited questions, and full CBT access. The Classroom Plan pools 300 AI messages per student across the class, and an AI top-up pack of 50 extra messages costs ₦1,500.

6. What the Partner Plan could earn the school (illustrative, yearly)

REGISTERED STUDENTS	COMMISSION	SCHOOL EARNS (YEARLY ₦28,000)
50 students	20%	**₦280,000**
100 students	25%	**₦700,000**
200 students	25%	**₦1,400,000**

Figures assume the ₦28,000 yearly plan. Actual earnings depend on adoption.

7. About ExamPadi AI

ExamPadi AI is built by Jadai Studios, a Nigerian ed-tech team led by a final-year Computer Science student at Plateau State University. We built ExamPadi because we sat these exams ourselves — without a tutor, without a pattern bank, and without anyone showing us how the exam actually works from inside the seat. ExamPadi is the tool we wish we had.

8. Our commitments to the school

- Teacher accounts live within 24 hours of an agreed start, with a named technical contact for the full session.
- A two-week pilot with one class before any wider rollout, with our team on call for the full fortnight.
- Teacher training and dashboard walkthroughs at no charge, repeated on request.
- No hidden charges, no lock-in beyond the current term, and student data used only for the school's own teaching.

Commission is paid monthly in arrears by the 10th of the following month, on collected payments only. Full statements are available in the school dashboard at any time.

9. Rollout plan

- **Week 1 — Onboarding.** Teacher accounts created, classes set up, one class selected for the pilot.
- **Week 2–3 — Pilot.** One class uses ExamPadi daily; teachers review the dashboard weekly; we adjust settings on their feedback.

  Pilot success metrics: minimum 20 minutes/day of practice per student; target +15% accuracy improvement from week 1 to week 2; target 5+ hours/week of teacher time saved on question prep; 80%+ student satisfaction.
- **Week 4 — Wider rollout.** Extend to every interested class, with a second training pass for any new teachers.
- **Ongoing — Support.** Monthly usage and performance reviews, plus continuous platform improvements based on teacher feedback.

10. Refund policy and responsible use

Yearly Pro includes a 14-day money-back guarantee if the student has used fewer than 30 AI messages. Monthly Pro is non-refundable after 48 hours except in cases of technical failure. AI top-up packs are non-refundable once purchased.

Student data belongs to the student and the school. We do not sell it, we do not use it to train third-party models, and teachers can export or delete class records on request. We comply with the Nigeria Data Protection Regulation. AI output is a study aid, not a marking authority — teachers remain the final judge of a student's work.

11. Next steps

1. Schedule a free 30-minute demonstration for your staff.
2. Register the school so a Partner code and dashboard are issued.
3. Run the two-week pilot with one class.
4. Review the pilot results and decide on the wider rollout.
